CORONET MESSIN

Reproduced from the original design of the machine, the Coronet Messin was a mechanical cipher machine used by the British during the Second World War. It was a portable machine, weighing only 15 lbs, and was used for secure communication between the British and the Allies.

Dotazy?

A photograph of a rocket launch over the ocean. A large, billowing plume of white smoke and fire rises from the water's surface. A small, dark object, likely the rocket, is visible within the plume, moving upwards. The sky is a clear, pale blue.
